

## ROLES

- Team Lead
- Senior Engineer

## SKILLS

- JavaScript
- Node.js
- Vue.js
- Vuex
- HTML/CSS
- jQuery
- Webpack
- Lua
- Git

## EDUCATION

1994- 1999

Yaroslavl State Technical  
University

- Master

## LANGUAGES

- Russian (native)
- English (written proficiency, document handling)

## SELECTED PROJECTS

- Specialized terminal application for call centers, online travel agencies, airline ticket offices, and travel/MICE agents interacting with airlines using PSS (Passenger Service System) platforms
  - Management of a group of web developers 2-5 people
  - Coordination of tasks with the customer, assessment of the complexity of tasks
  - Distribution of tasks between developers
  - Providing developers with tasks in the absence of tasks from the customer
  - Code review, evaluation of the quality of work
  - Conducting weekly meetups
  - Release preparation
- Passenger processing and departure control system (DCS) for managing and monitoring airline passenger handling at the airport
  - Development of the client part of web applications for aircraft systems, for the self check-in counter at the airport
  - Interaction with analysts on terms of reference for the implementation of business logic elements
  - Optimization of the build and performance of the client side
  - Liaising with back end developers
  - Participation in the discussion and setting tasks
- Software for self-service kiosks at airports, enabling passenger check-in and baggage drop-off automation
  - Developed kiosk software for check-in, seat selection, and baggage tag printing
  - Integrated peripheral devices (scanners, printers, scales) via SDKs and protocols
  - Designed user-friendly UI for touch-screen kiosks with multilingual support
- CAD / CAM
  - Designed and enhanced specialized editors for cable harness and electrical circuit design, tailored to meet strict technical and industry-specific requirements
  - Delivered fully cloud-based CAD solutions accessible via web browsers—no high-performance workstation required
  - These solutions can be packaged for Windows, Linux, macOS, and also function on mobile devices
  - Emphasize modern UI with excellent performance
  - At the core is a robust algorithmic engine based on graph traversal techniques, enabling fast feature development and flexible adaptation
