LETTER OF RECOMMENDATION

FORMAL EMPLOYMENT REFERENCE & PERFORMANCE EVALUATION

This is to certify that Mr. **Sergei Lediankin** collaborated with **JSC “Online Reservation System” (ORS)** from **March 2017 to July 2025** (via our partner company LogicEditor). Over this eight-year period, he advanced successfully from Web Developer to Team Lead / Lead Frontend Engineer.

JSC “ORS” develops high-availability, mission-critical enterprise IT solutions and platforms for the aviation and travel industry (international airlines, airports, and global travel agencies).

Core Products and System Architecture

As a core developer and subsequently as Team Lead, Mr. Lediankin made significant contributions to the development and enhancement of our flagship software systems:

- **ORS TWT (Travel Web Terminal):** A specialized enterprise B2B web terminal connecting travel agencies, call centers, and airline ticket offices with Passenger Service System (PSS) platforms.
- **ORS DCS (Departure Control System):** A mission-critical platform managing airport passenger check-in, boarding gate controls, and automated self-service kiosks.

Key Responsibilities and Scope of Work

- Full-cycle engineering ownership: from technical architecture, planning, and task estimation to code delivery and release management.
- Continuous evolution and modernization of user interfaces (UI/UX) with a dedicated focus on reliability, fault tolerance, and performance.
- Client-side architectural improvements, build pipeline optimization (Webpack, Vite), and codebase refactoring.
- Technical leadership, task delegation, sprint coordination, and mentoring for a frontend team of 2 to 5 developers, including regular code reviews.
- Close cross-functional collaboration with backend engineering teams, product analysts, and airline stakeholders to ensure strict compliance with aviation standards (IATA).

Performance and Professional Appraisal

Throughout his tenure, Mr. Lediankin established himself as a highly responsible, disciplined, and technically accomplished engineer. He proactively handled complex business and domain logic, consistently delivering reliable, maintainable, and high-performance solutions.

He carried out all duties entrusted to him with utmost diligence, initiative, and **always to our full and highest satisfaction**. His professional conduct toward executive leadership, colleagues, team members, and external partners was exemplary at all times.

Departure and Endorsement

The termination of our collaboration in July 2025 was solely due to internal corporate restructuring.

We sincerely thank Mr. Lediankin for his outstanding dedication, long-standing service, and valuable contributions to the success of our products. We regret his departure and recommend him without reservation as a highly skilled software engineer and competent team leader who will be an invaluable asset to any engineering organization. We wish him continued professional success and all the best for the future.

Moscow, July 08, 2025	JSC “Online Reservation System” (ORS) General Director A. Y. Sizintsev <i>(Signed & stamped with official corporate seal in original)</i>

РЕКОМЕНДАТЕЛЬНОЕ ПИСЬМО

Настоящим письмом подтверждаем, что Сергей Ледянкин сотрудничал с компанией ORS (АО «Онлайн Резервейшн Систем») с марта 2017 по июль 2025 года (через компанию-партнера LogicEditor), пройдя за это время путь от веб-разработчика до тимлида.

В качестве ключевого разработчика, а затем и руководителя команды, Сергей внес значительный вклад в развитие наших продуктов, включая TWT (веб-терминал) и LDCS (система регистрации пассажиров). Он отвечал за развитие UI, улучшение архитектуры кода и повышение стабильности систем.

Как руководитель команды, Сергей брал на себя полный цикл работ: от планирования и архитектурных решений до контроля сроков и наставничества для других разработчиков. Он зарекомендовал себя как ответственный, высокоорганизованный и технически грамотный специалист.

Расставание с Сергеем связано исключительно с внутренней реструктуризацией компании. Мы искренне благодарны ему за проделанную работу и с полной уверенностью рекомендуем его как квалифицированного специалиста и компетентного руководителя, который станет ценным сотрудником для любой команды.

08 июля 2025 г.

С уважением,
Генеральный директор АО «ОРС»

/ Сизинцев А.Ю. /
